Level of care requested: OUTPATIENT. Place of service: Home.

Submission Contact

Submitted through the provider portal by Dina Pruitt, Authorization Coordinator.
Supporting clinical documentation attached (4 pages including this request).

Sleep Medicine Consultation

Patient: Raymond Okafor, a 64-year-old adult seen in clinic on 2026-09-02.

Reason for visit

Loud snoring, witnessed pauses in breathing, and unrefreshing sleep for about two years. A family member reports the patient falls asleep while watching television.

Assessment

A face-to-face clinical evaluation for obstructive sleep apnea was completed today, including history, Epworth sleepiness score of 14, neck circumference and airway exam. He has no history of a prior CPAP trial.

Plan

Order a sleep study. If it confirms obstructive sleep apnea, start CPAP therapy.

Sleep Study Report

Patient: Raymond Okafor Study date: 2026-09-16

Test

Attended in-lab polysomnography (PSG). The study was ordered by the patient's treating physician, Dr. Elena Marsh, and performed under the supervision of a board-certified sleep physician.

Results

Apnea-hypopnea index (AHI): 28 events per hour. Study length was adequate for the number of events scored.

Lowest oxygen saturation 84 percent.

Interpretation

Moderate to severe obstructive sleep apnea. Interpreted by Dr. Elena Marsh.

CPAP Education Visit

Patient: Raymond Okafor Date: 2026-09-28

The patient attended a face-to-face education session with the equipment supplier's respiratory therapist before the equipment was ordered. The therapist reviewed how CPAP works, mask fitting, cleaning, and the importance of nightly use.
