Bariatric surgical consultation

HALCYON LAKES SURGICAL ASSOCIATES - Metabolic & Bariatric Surgery

Date of visit: 2026.09.17

Name: OYEBANJI, FITZGERALD A. Age 63 Male

Measurements: height 68 in, weight 280.9 lb, BMI 42.7. BP 136/80.

Mr. Oyebanji has type 2 diabetes (diagnosed 2011, now on metformin and insulin glargine, A1c 8.3), moderate obstructive sleep apnea using CPAP nightly, and hypertension on two agents. He finished a six-month physician-supervised weight program in May without success.

Plan: laparoscopic Roux-en-Y gastric bypass. Clearances complete.

Signed: Beatriz Castellanos-Whitlow, MD

Weight management program completion letter

HALCYON LAKES MEDICAL WEIGHT CLINIC

Letter dated 2026.05.11

Re: Fitzgerald Oyebanji

Mr. Oyebanji took part in our physician-supervised program from 2025.11.03 to 2026.05.04 under Dr. Anselm Okpara. He came to all six monthly visits.

Program: partial meal replacement (two shakes a day), a 1,600 kcal plan, a supervised walking plan building to 150 min a week, and cognitive-behavioral sessions with our psychologist.

Weight at entry 287.0 lb; at exit 281.8 lb (a 1.8% loss). He did not reach the 5% target.

We consider medical weight management unsuccessful and support surgical referral.

A. Okpara, MD (Obesity Medicine)

Operative plan and level of care

HALCYON LAKES SURGICAL ASSOCIATES - OPERATIVE PLAN

Written 2026.09.30 Patient: Oyebanji, Fitzgerald A. MBR-26854

Operation: laparoscopic Roux-en-Y gastric bypass, CPT 43644. Admission 2026.12.02, inpatient.

We expect him to stay two midnights.

Why: obstructive sleep apnea needing CPAP and continuous oximetry on the ward; insulin-treated diabetes needing dose cuts and glucose checks as feeding restarts; hypertension needing medicine changes.
