Member Information

Member: Annika S. Folau DOB: 1950-02-07 (age 76) Member ID: MBR-60291

Sex: F

Requesting Provider

Practice: Harrowgate Cardiology & Rhythm

Requested Service

Requested service: Elective inpatient admission, implantation of a transvenous implantable cardioverter defibrillator (ICD)

CPT 33249

Planned admit date: 2026-10-30

Level of care requested: INPATIENT

Made-up data for a software prototype. Not a real patient.

Cardiology follow-up note

HARROWGATE CARDIOLOGY & RHYTHM

Follow-up, 18 September 2026

Mrs. Annika Folau (76)

Known ischemic cardiomyopathy: NSTEMI May 2018, CABG x2 (LIMA-LAD, SVG-RCA) May 2018. No events since.

Breathless after about 2 blocks; fine with housework at her own pace. NYHA II.

She had a gated coronary CT angiogram on 2 September to check her grafts after atypical chest pain. Grafts widely patent, no new disease, no intervention needed. The CT functional analysis gave LVEF 30%, down from 38% on echo in June 2025.

Plan: refer to EP for primary prevention ICD based on the CT LVEF.

Dr. Theo Marchbanks

Made-up data for a software prototype. Not a real patient.

Coronary CT angiogram report

HARROWGATE IMAGING - CT CORONARY ANGIOGRAM WITH FUNCTIONAL ANALYSIS

Date: 2 September 2026

Folau, Annika S.

Technique: retrospective ECG-gated, 10 phases reconstructed.

Grafts: LIMA-LAD patent. SVG-RCA patent. Native vessels: chronic occlusions as before, no new stenosis.

Functional analysis (CT): LVEDV 162 mL, LVESV 113 mL, LVEF 30%.

Impression: patent bypass grafts. Reduced LV function on CT functional analysis, LVEF 30%.

Made-up data for a software prototype. Not a real patient.

Echocardiogram report (2025)

HARROWGATE CARDIOLOGY - ECHOCARDIOGRAM

Date: 10 June 2025

Folau, Annika

LVEF 38% (biplane). Inferior hypokinesis. Mild MR.

Impression: mildly-moderately reduced LV function.

Made-up data for a software prototype. Not a real patient.

EP consultation and SDM

HARROWGATE CARDIOLOGY & RHYTHM - ELECTROPHYSIOLOGY

25 September 2026

Annika Folau, with husband

Indication reviewed: ICM, LVEF 30% (CT 2 Sept), NYHA II, on GDMT since 2018.

Shared decision-making done today by me with an evidence-based ICD decision aid (printed). Covered benefit, shocks, complications, deactivation and the option to wait for repeat imaging. She chose the ICD.

Plan: implant 30 October.

Dr. Ngaio Petersen-Obi

Made-up data for a software prototype. Not a real patient.

Medication list

Folau, Annika - current medicines (18 Sept 2026)
carvedilol 12.5 mg twice daily - since 15 May 2018
valsartan 80 mg twice daily - since 15 May 2018
eplerenone 25 mg daily - since 2019
dapagliflozin 10 mg daily - since 2023
aspirin 81 mg, atorvastatin 40 mg
levothyroxine 100 mcg

Made-up data for a software prototype. Not a real patient.

Admission plan

HARROWGATE EP - ADMISSION PLAN 1 October 2026

Folau, Annika S. MBR-60291 CPT 33249 Admit 30 October 2026 (inpatient)

Expected stay: 2 midnights.

Reasons: age 76 with osteoporotic spine fractures (positioning, pain control); hypothyroidism; lives alone - needs PT and device check before discharge.

No heart attack, stent or bypass since 2018.

Limiting conditions: none (no dementia, no terminal illness, no AF, stable).

Dr. Ngaio Petersen-Obi
