Member Information

Member: Philippa N. Carrow DOB: 1953-10-27 (age 72) Member ID: MBR-37709

Sex: F

Requesting Provider

Practice: Granite Bay Heart Center

Requested Service

Requested service: Elective inpatient admission, implantation of a transvenous implantable cardioverter defibrillator (ICD)

CPT 33249

Planned admit date: 2026-11-03

Level of care requested: INPATIENT

EP consultation

GRANITE BAY HEART CENTER - ELECTROPHYSIOLOGY CONSULT

Date of service: 09/21/2026

Patient: CARROW, PHILIPPA N. DOB 10/27/1953

72F, NSTEMI 05/2022 -> CABG x4 06/14/2022. Persistent LV dysfunction despite revasc + GDMT. Recent cardiac PET: LVEF 30%, large anterior scar, minimal viable myocardium.

Symptoms: walks to end of block and must rest; bathing tires her. No rest symptoms. NYHA III. No syncope.

No interval ACS. No PCI since CABG.

Discussion: I explained the ICD, the procedure, and the main risks and benefits. Gave her our device brochure. She is leaning toward proceeding.

Plan:

1. Formal SDM visit with HF NP using the ICD decision aid - scheduled 10/20/2026.
2. Tentatively book ICD 11/03/2026 pending SDM + auth.
3. Continue GDMT. Consider adding SGLT2i.

Dr. Ruairi Fennimore, MD

Cardiac PET report

GRANITE BAY IMAGING - CARDIAC PET/CT (Rb-82 perfusion + FDG viability)

Exam date: 08/26/2026

Pt: Carrow, Philippa

Rest/stress perfusion: large severe fixed defect LAD territory; no reversible ischemia.

FDG: matched defect - scar, no significant hibernating myocardium.

Gated LVEF: rest 30%, stress 31%.

Impression: Large anterior infarct, nonviable. LVEF 30%.

Medication list

Carrow, Philippa N. Medication Reconciliation 09/21/2026

- carvedilol 12.5 mg BID (start 07/05/2022)
- sacubitril/valsartan 24/26 BID (start 07/05/2022)
- eplerenone 25 mg daily (start 09/2022)
- aspirin 81 mg daily
- atorvastatin 80 mg daily
- furosemide 40 mg daily
- sertraline 50 mg daily

Planned: empagliflozin 10 mg - to start at 10/20 visit.

Admission plan

GRANITE BAY HEART CENTER - ICD ADMISSION PLAN

Prepared: 10/01/2026

Patient: Philippa N. Carrow / MBR-37709 / CPT 33249

Admit: 11/03/2026 (inpatient)

Anticipated LOS: 2 midnights

Supporting factors: prior sternotomy w/ L subclavian venous anatomy uncertain, may need contrast venogram; CKD 3a; depression on SSRI w/ procedural anxiety requiring deeper sedation and monitoring.

SDM: scheduled 10/20/2026 (prior to implant).

Limiting conditions: none - cognitively intact, no illness limiting survival <1 yr, no AF, stable.
