Member Information

Member: Augustin F. Lemaire DOB: 1951-12-12 (age 74) Member ID: MBR-22648

Sex: M

Requesting Provider

Practice: Pine Crest Cardiovascular Associates

Requested Service

Requested service: Elective inpatient admission, implantation of a transvenous implantable cardioverter defibrillator (ICD)

CPT 33249

Planned admit date: 2026-10-28

Level of care requested: INPATIENT

Made-up data for a software prototype. Not a real patient.

Heart failure NP follow-up

PINE CREST CARDIOVASCULAR ASSOCIATES - HF Clinic

Follow-up 09/30/2026

Augustin Lemaire 74M

Feels better than in August. Doing his garden, still has to stop after carrying bags up the stairs. No orthopnea. Wt down 4 lb.

BP 104/62, HR 58.

A/P:

- ICM, HFrEF. NYHA II.

- EF likely improved given clinical improvement and uptitration; we have not repeated the echo. Possibly he no longer meets ICD criteria if EF has recovered, but no new imaging to say so. Will defer to EP.

- Cont GDMT.

Shared decision making note

SDM - ICD 09/16/2026

Pt: Augustin Lemaire Daughter (Celine) present

Clinician: Marcus Oyibo, PA-C

Decision aid: evidence-based ICD decision aid (French-language booklet at pt request).

Covered absolute benefit, risks, shocks, deactivation, option to repeat echo first and defer.

Pt prefers to proceed now rather than wait for repeat imaging.

PCP visit note

ELMWOOD PRIMARY CARE 09/02/2026

Lemaire, Augustin F. annual wellness visit

Daughter wonders about memory - misplacing keys. MoCA today 26/30 (normal range). No dementia. Independent in all ADLs/IADLs, manages own meds and finances.

Other: BPH stable, CKD 3a (Cr 1.4), mild hearing loss.

Cancer screening up to date, no malignancy.

Hye-jin Calloway, MD

Pre-admission plan

PRE-ADMISSION PLAN - EP LAB 10/01/2026

Patient: Lemaire, Augustin F. MBR-22648 CPT 33249 Admit 10/28/2026

Proceed based on most recent measured LVEF (TTE 08/19/2026: 30%). No repeat imaging planned prior to implant.

Expected LOS: 2 midnights.

Factors: clopidogrel continued (prior RCA stent) - pocket hematoma risk; CKD 3a; bradycardia on high-dose BB (HR 58) - device check and telemetry overnight; BPH w/ prior retention.

Limiting conditions: none (cognition normal by MoCA, no terminal illness, no AF, stable).

No ACS or revascularization since 2019.
