## Pre-operative surgical visit

NORTHSHORE WEIGHT LOSS SURGERY CENTER

Pre-op visit 09/22/2026

Gutierrez, Annabel P.

Ht 64 in Wt 198.6 lb BMI 34.1

Interval: hospitalized 06-07/2026 for perforated diverticulitis, unintentional ~25 lb weight loss since April due to illness and poor intake. Appetite now back; I expect regain.

T2DM improved w/ weight loss (A1c 6.9). Still on CPAP.

A/P: proceed with RYGB as planned; weight loss was illness-related, not durable.

Expected LOS: 2 midnights - OSA on CPAP, T2DM, recent intra-abdominal sepsis w/ possible pelvic adhesions.
