

Prior Authorization Request - Inpatient Admission

Health Plan

Humana Medicare Advantage. Plan ID: H5216-014-000. Request type: standard pre-service review.
Date of request: 2026-10-04

Member Information

Member: Marcia Delgado-Finch DOB: 1960-02-17 (age 66) Member ID: MBR-30644
Address: 903 Cobblestone Way, Dayton, OH 45419
Phone: (937) 555-0133 Sex: F
Primary insurance: Humana Medicare Advantage (primary). Secondary: none on file.

Requesting Provider

Dr. Joel Hartmann, MD -- Bariatric Surgery
NPI: 1086392745
Practice: Lakeview Bariatric & Metabolic Surgery Center
Phone: (937) 555-0160 Fax: (937) 555-0161

Requested Service

Requested service: Elective inpatient admission, laparoscopic Roux-en-Y gastric bypass
CPT 43644 ICD-10: E66.01 (Morbid obesity); E11.9; G47.33
Planned admit date: 2026-11-09
Level of care requested: INPATIENT
Place of service: Hospital, inpatient (acute care).

Submission Contact

Submitted through the provider portal by Sheila Brandt, Authorization Coordinator.
Callback: (937) 555-0160. Supporting clinical documentation attached (7 pages including this request).

Bariatric Surgery Consultation / History and Physical

Date: 2026-09-15. Patient: Marcia Delgado-Finch Age: 66 Sex: F

Chief complaint

Severe obesity with obesity-related disease; evaluation for surgical weight loss.

HPI

Ms. Delgado-Finch is a 66-year-old woman with class III obesity of more than twenty years' duration. She has type 2 diabetes, hypertension and obstructive sleep apnea, each of which is worsening. Knee and back pain now limit walking. She completed a 12-month physician-supervised weight management program (details on pages 3 and 4) and, despite full participation, has regained the weight she lost.

Anthropometrics

Height 65 in. Weight 254 lb. BMI 42.3 kg/m² (measured in clinic 2026-09-15).

Past medical history

Type 2 diabetes mellitus (on metformin, HbA1c 8.1%). Hypertension. Obstructive sleep apnea on CPAP. Osteoarthritis of the knees. Hysterectomy 2004. Cholecystectomy 2012.

Medications

Metformin 1000 mg BID, lisinopril 20 mg daily, amlodipine 5 mg daily, liraglutide 3 mg daily (weight management), atorvastatin 20 mg nightly, acetaminophen PRN. NKDA.

Social

Never smoker, no alcohol. Lives with husband. Retired bookkeeper.

Exam

BP 134/82, HR 78, SpO₂ 96%. Neck circumference 17 in. Abdomen obese, soft, no hernia. Mild bilateral knee crepitus. No edema.

Assessment and plan

Class III obesity with T2DM, hypertension and OSA, previously unsuccessful with medical treatment. Candidate for laparoscopic Roux-en-Y gastric bypass. Pre-op workup completed.

Registered Dietitian Notes - Supervised Weight Management Program

Program: Physician-supervised medical weight management program, enrolled 2025-08-12, completed 2026-08-12.

Patient: Marcia Delgado-Finch. Dietitian: Ruth Calloway, RD, LDN. Supervising physician: Dr. A. Mehra.

Structure

Monthly visits with the registered dietitian, 12 consecutive monthly visits, all attended (12 of 12). 1,200-1,400 kcal meal plan, food and activity logs reviewed at each visit, structured walking program, behavioral counseling, and physician review quarterly.

Weight trajectory

Visit	Weight (lb)	BMI
2025-08-12	268	44.6 (program intake)
2025-11-11	259	43.1
2026-02-10	252	41.9 (nadir)
2026-05-12	258	42.9
2026-08-12	266	44.3 (program exit)

Outcome

Initial loss of 16 lb over six months, followed by regain of 14 lb despite adherence; the patient plateaued after month 6. Program judged unsuccessful for sustained weight loss. No further benefit expected from continuing non-surgical care. Recommend surgical consultation.

Primary Care Notes and Anti-Obesity Medication

Patient: Marcia Delgado-Finch. PCP: Dr. L. Osei. Visits 2025-09 through 2026-07 summarized.

Anti-obesity pharmacotherapy

Liraglutide 3 mg daily (Saxenda) started 2025-09-15 as an adjunct to the dietitian program; titrated over 5 weeks. Continued 11 months. Early loss of about 9 lb then plateau; nausea mild. Weight regained while still on full dose. Considered unsuccessful.

Comorbidity management

Type 2 diabetes: metformin, HbA1c 8.3% (2025-08), 8.1% (2026-07). Hypertension: lisinopril and amlodipine, BP 130s/80s. Sleep apnea: diagnosed on polysomnography (AHI 34/hr), on CPAP with good adherence.

Other

Influenza vaccine given 2025-10. Colonoscopy 2024 normal. Mammogram 2026-03 normal. Statin continued.

Psychological Evaluation - Pre-Bariatric

Date: 2026-08-26. Evaluator: Dr. S. Landry, PhD, clinical psychologist. Patient: Marcia Delgado-Finch

Method

90-minute clinical interview, MMPI-3, BDI-II, structured eating disorder screen.

Findings

Mood euthymic. BDI-II score 7 (minimal). No binge-eating disorder, no bulimia, no active substance use. Understands the procedure, lifelong vitamin supplementation, and dietary changes. Realistic expectations. Supportive spouse. No history of psychiatric hospitalization.

Opinion

Psychologically cleared for bariatric surgery. No contraindication identified. Recommend post-operative support group.

Laboratory, Sleep Study and Pre-operative Testing

Labs 2026-09-02

HbA1c	8.1%
Fasting glucose	158 mg/dL
Creatinine	0.8 mg/dL
ALT / AST	38 / 31 U/L
Vitamin D 25-OH	19 ng/mL (L)
B12	412 pg/mL
Hemoglobin	13.4 g/dL

Polysomnography (2024-11): AHI 34 events/hour, moderate-to-severe OSA. CPAP prescribed.

Upper endoscopy 2026-08-20: mild gastritis, H. pylori negative, no hiatal hernia.

ECG 2026-08-28: normal sinus rhythm. Chest X-ray: clear.

Comment: pre-operative clearance from cardiology not required; low risk by RCRI.

Bariatric Surgeon Operative Plan

Date: 2026-09-22. Surgeon: Dr. Joel Hartmann, MD, bariatric surgery. Patient: Marcia Delgado-Finch.

Procedure

Laparoscopic Roux-en-Y gastric bypass (CPT 43644). Five ports, 30 mL gastric pouch, 100 cm Roux limb, stapled gastrojejunostomy, leak test with methylene blue.

Expected hospital course

Expected length of stay: 2 midnights. Day 0 monitoring with CPAP, DVT prophylaxis, glucose management. Upper GI series post-op day 1 as needed. Discharge on post-operative day 2 if tolerating liquids.

Comorbidities driving peri-operative risk

Type 2 diabetes, hypertension, obstructive sleep apnea requiring CPAP.

Readiness

Dietitian-supervised program completed, psychological clearance obtained, patient educated, and consent discussion scheduled for admission day.
