Bariatric Surgery Evaluation - History and Physical

Date: 2026-09-18. Patient: Thomas Eberhardt Age: 66 Sex: M
Referral source: Dr. G. Pruitt (primary care).

Reason for visit

Consultation regarding surgical treatment of severe obesity.

HPI

Mr. Eberhardt is a 66-year-old man with severe obesity and type 2 diabetes. He reports gradual weight gain over adulthood and is now bothered by exertional fatigue, knee pain on stairs, and a rising HbA1c. He is motivated and has read about gastric bypass. No history of GI bleeding, ulcer disease or reflux requiring surgery.

Measurements

Height 68 in. Weight 259 lb. BMI 39.4 kg/m² today.

Past medical history

Type 2 diabetes mellitus. Benign prostatic hyperplasia. Right inguinal hernia repair 2009. Left knee arthroscopy 2015.

Medications

Metformin 1000 mg BID, glipizide 5 mg daily, tamsulosin 0.4 mg nightly. NKDA.

Social history

Married, retired electrician. Quit smoking 2002. Two to three beers a week. Drives, independent.

Exam

BP 128/78, HR 76, SpO₂ 97%. Obese abdomen, no scars other than hernia repair site, no hernia currently. No edema. Gait normal.

Impression

Class II obesity (BMI 39.4) with type 2 diabetes. Surgical evaluation under way. Orders: labs, EGD, psychological evaluation, anesthesia screen.

Primary Care Progress Note

Date: 2026-08-27. Patient: Thomas Eberhardt. PCP: Dr. G. Pruitt.

Diabetes

HbA1c 7.9% (previously 7.4%). Home fasting glucose 130-160. No hypoglycemia. Foot exam normal, monofilament intact. Retinal exam 2026-02 without retinopathy. Urine albumin/creatinine 18 mg/g (normal).

Other

BP 126/76 off antihypertensives. Lipids: LDL 98 on no statin; discussed starting atorvastatin, patient will think about it. Prostate: IPSS 8, stable on tamsulosin. Hearing screen normal. Immunizations current.

Plan

Refer to bariatric surgery for evaluation as requested by the patient. Recheck HbA1c in 3 months. Continue metformin and glipizide.

Laboratory and Pre-operative Testing

Labs 2026-09-10

HbA1c	7.9%
Fasting glucose	149 mg/dL
Creatinine	1.0 mg/dL
ALT / AST	44 / 36 U/L
Total cholesterol	182 mg/dL
TSH	1.7 mIU/L
Vitamin D 25-OH	26 ng/mL
Hemoglobin	14.6 g/dL

Upper endoscopy 2026-09-12

Normal esophagus, small (<2 cm) sliding hiatal hernia, mild antral gastritis, biopsies negative for H. pylori.

ECG 2026-09-12: sinus rhythm, no acute changes. Chest X-ray: no infiltrate.

Liver ultrasound: mild hepatic steatosis.

Psychological Evaluation

Date: 2026-09-14. Evaluator: Dr. W. Haddad, PsyD. Patient: Thomas Eberhardt

Clinical interview and standardized inventories (BDI-II 5, GAD-7 3). No active mood or anxiety disorder, no eating disorder, no substance misuse. Good understanding of risks, benefits and lifelong follow-up. Support from spouse. Cleared from a psychological standpoint to proceed with bariatric surgery.

Anesthesia Pre-operative Screening

Date: 2026-09-21. Patient: Thomas Eberhardt. ASA class: III (obesity, diabetes).

Mallampati II, neck circumference 16.5 in, STOP-BANG 2 (low risk for sleep apnea). Good functional capacity, more than 4 METs. No cardiac symptoms. Airway: no difficult-airway predictors. NPO instructions given. Hold glipizide the morning of surgery. Continue metformin until the day before.

Bariatric Surgeon Operative Plan

Date: 2026-09-28. Surgeon: Dr. Naomi Feldstein, MD, bariatric surgery. Patient: Thomas Eberhardt.

Procedure

Laparoscopic Roux-en-Y gastric bypass, CPT 43644.

Hospital course

Inpatient stay of 2 midnights anticipated: glucose management with insulin sliding scale, early ambulation, VTE prophylaxis, advancement from clear liquids to full liquids, hydration. Discharge on post-operative day 2.

Comorbidity

Type 2 diabetes mellitus on oral agents.

Plan

Pre-op labs and testing complete; psychological clearance obtained; anesthesia screened. Will request inpatient authorization.
