Level of care requested: INPATIENT
Place of service: Hospital, inpatient (acute care).

Submission Contact

Submitted through the provider portal by Reyna Castellanos, Authorization Coordinator.
Callback: (419) 555-0170. Supporting clinical documentation attached (5 pages including this request).
Expected length of stay: 3 midnights.

Orthopedic Office Note

Date: 2026-09-30. Patient: Harold Jennings, age 73, male.

History

Knee pain for about 2 years, now worse. Pain 5 to 6 out of 10 with activity. The right knee gives out occasionally and he has had one near-fall. He still walks around the house and shops with a cart. He would like a knee replacement 'so I can play golf again.'

Medications: metformin, lisinopril, warfarin for atrial fibrillation. Ibuprofen was tried for about 3 weeks last year and stopped because of stomach upset. Physical therapy was recommended, patient declined because of cost.

Examination

Height 68 in, weight 273 lb, BMI 41.5 kg/m². Right knee: mild effusion, medial joint line tenderness, flexion 100 degrees.

Imaging

Weight-bearing films were ordered. Report to follow. An outside MRI report is attached.

Plan

Schedule total knee replacement. Corticosteroid injection given today, response to be assessed in 2 weeks.

Outside MRI Report - Knee

Date: 2026-07-12. Facility: Northwest Imaging. Study: MRI of the knee without contrast. Laterality in the report header: not stated.

Findings: Tricompartmental chondromalacia with grade 2 to 3 changes in the medial compartment. Small joint effusion. Degenerative tear of the posterior horn of the medial meniscus. Mild marginal osteophytes. No avascular necrosis.

Impression: Degenerative changes of the knee with chondromalacia and meniscal tear. Clinical correlation recommended.

Primary Care Summary

Date: 2026-09-10. Physician: Dr. Lisa Park, MD.

Type 2 diabetes, hemoglobin A1c 9.3% (uncontrolled), on metformin. Atrial fibrillation on warfarin, INR 2.6. Hypertension.

Knee pain managed with acetaminophen as needed. Patient was advised to lose weight and to attend physical therapy.

Prior Authorization Fax Cover

Please authorize total knee arthroplasty. Surgery date tentatively 2026-11-23. Weight-bearing X-ray report will be sent when received. Physical therapy records not available.
