FAX - RESPONSE TO REQUEST FOR INFORMATION

To: Humana UM / Prior Auth
From: Dana Pruitt, Authorization Coordinator
Date: 10/09/2026
Re member: Luis Ortega
Member ID: MBR-43005
Request: Permanent spinal cord stimulator implant, CPT 63685

Your question:

Please send the spinal cord stimulator trial documentation: the trial dates, the change in pain and medication, and any functional improvement.

Our answer:

Sorry, the trial report was left out. It's on the next page. Call (419) 555-0140 with questions. - Dana

Spinal Cord Stimulator Trial Report

Trial dates: 09/14/2026 to 09/21/2026 (7 days) Patient: Luis Ortega Member ID MBR-43005

Trial

Percutaneous trial with two temporary epidural leads at T8 to T10, placed in the hospital outpatient department. This was the patient's first spinal cord stimulator trial. No prior SCS trials in any spinal region.

Pain

Target pain NRS 8/10 before the trial and 3/10 during the trial: a 63% reduction in target pain.

Medication

Oxycodone reduced from 30 mg a day before the trial to 10 mg a day during the trial (a 67% reduction).

Function

Functional improvement: walking tolerance went from 2 blocks to 1 mile, sitting from 20 minutes to 1 hour, and sleep from 4 to 7 hours.

Result

Positive trial. The patient experienced a clear positive response and wants to proceed to the permanent implant.
