

Prior Authorization Request - Outpatient Procedure

Health Plan

Humana Medicare Advantage. Plan ID: H5216-014-000. Request type: standard pre-service review.
Date of request: 2026-10-06

Member Information

Member: James Anderson DOB: 1974-06-15 (age 52) Member ID: MBR-44001
Address: 56 Beacon Hill Rd, Akron, OH 44304
Phone: (330) 555-0104 Sex: M
Primary insurance: Humana Medicare Advantage (primary). Secondary: none on file.

Requesting Provider

Dr. Elena Park, MD -- Otolaryngology, Sleep Surgery
NPI: 1396057248
Practice: Lakeshore Ear, Nose and Throat and Sleep Surgery
Phone: (330) 555-0150 Fax: (330) 555-0151

Requested Service

Requested service: Hypoglossal nerve stimulator implantation for obstructive sleep apnea
CPT 64582 ICD-10: G47.33 (Obstructive sleep apnea)
Planned admit date: 2026-11-10
Level of care requested: OUTPATIENT
Place of service: Hospital outpatient department.

Submission Contact

Submitted through the provider portal by Pamela Duarte, Authorization Coordinator.
Callback: (330) 555-0150. Supporting clinical documentation attached (6 pages including this request).

ENT Sleep Surgery Consultation

Date: 2026-08-26. Patient: James Anderson, age 52, male.

History

Moderate to severe obstructive sleep apnea diagnosed in 2026. Loud snoring, witnessed apneas and daytime sleepiness (Epworth score 14). Could not tolerate CPAP, see sleep medicine note.

Examination

Height 70 in, weight 201 lb, BMI 28.8 kg/m². Tonsils grade 1. Friedman tongue position 3. No neuromuscular disease. No implanted electronic device (no pacemaker, no defibrillator). No history of heart failure, myocardial infarction or arrhythmia. Blood pressure controlled. No pulmonary disease.

Plan

Candidate for hypoglossal nerve stimulation. Drug-induced sleep endoscopy done, see report.

Polysomnography Report

Date of study: 2026-03-10 (attended in-lab polysomnogram). Interpreting physician: Dr. Aaron Cole, MD, Sleep Medicine.

Apnea-hypopnea index (AHI): 41 events/hour

Obstructive apneas: 92% of events Central apneas: 3% Mixed apneas: 5%

Lowest oxygen saturation: 78% Time below 90%: 14%

Impression: Severe obstructive sleep apnea. Central and mixed events are 8% of the total AHI.

Sleep Medicine Note - CPAP Failure and Shared Decision Making

Date: 2026-06-18. Physician: Dr. Aaron Cole, MD, Sleep Medicine.

CPAP trial from 2026-03-25 to 2026-06-10 with three mask types and pressure adjustments. Download data: average use 2.1 hours per night on 3 nights per week. Residual AHI on CPAP 21 events/hour. Patient is intolerant of CPAP, with less than 4 hours per night on fewer than 5 nights per week despite consultation with a sleep expert, mask refitting and desensitization.

Shared decision making was held on 2026-06-18 and documented: alternatives (oral appliance, surgery, hypoglossal nerve stimulation) discussed. Patient chooses hypoglossal nerve stimulation.

Drug-Induced Sleep Endoscopy Report

Date: 2026-08-12. Surgeon: Dr. Elena Park, MD.

Findings: Retropalatal collapse is anterior-posterior, partial. No complete concentric collapse at the soft palate level. Tongue base collapse moderate. Lateral wall collapse mild. No other anatomical findings that would compromise device performance.

Impression: Suitable airway pattern for hypoglossal nerve stimulation.

Pre-operative Medical Summary

Date: 2026-09-20. Physician: Dr. Laura Simmons, MD, Internal Medicine.

No pulmonary arterial hypertension (echo 2026-09-02: normal pulmonary pressures, ejection fraction 60%).

No valvular disease. No severe psychiatric illness. No MRI-incompatible devices. No contraindication to general anesthesia.

Device: FDA-approved hypoglossal nerve stimulation system.
