Level of care requested: OUTPATIENT  
Place of service: Hospital outpatient department.

### Submission Contact

Submitted through the provider portal by Lucia Santangelo, Authorization Coordinator.  
Callback: (330) 555-0205. Supporting clinical documentation attached (5 pages including this request).

## Pain Clinic Note

Date: 2026-10-01. Patient: Walter Stevens, age 76, male.

### History

Back pain for about 4 months after a minor fall in the spring. Pain 6/10 on average, worse with standing. Initially treated by his primary care physician with acetaminophen, then oxycodone for about 3 weeks. No brace. No formal physical therapy.

Past history: prostate cancer treated with androgen deprivation therapy, PSA recently rising. Bone scan in 2025 showed uptake at L2 and T10. Followed by oncology. Atrial fibrillation on warfarin.

### Examination

Tenderness over L2. Strength 5/5. Sensation intact. No neurologic deficit.

### Plan

Kyphoplasty at L2 to relieve pain. Warfarin to be held 5 days before the procedure.

## Plain Film Report - Lumbar Spine

Date: 2026-07-15. Study: AP and lateral radiographs of the lumbar spine.

Findings: Compression deformity of L2 with about 30% height loss. Osteopenia. Degenerative changes at multiple levels. No MRI or bone scan was performed during this episode. Age of the fracture cannot be determined from this study.

## Lab Results

Date: 2026-09-28. INR 2.6 (on warfarin). Platelets 190. PSA 14.2 ng/mL, up from 6.0 six months ago. Hemoglobin 11.9. Calcium 9.8. Alkaline phosphatase 168 (mildly elevated).

## **Fax Cover**

Please authorize L2 kyphoplasty, scheduled 2026-10-28. MRI will be done if required. Oncology notes available on request.
