Re member: Patricia Coleman

Member ID: MBR-46005

Request: Left prefrontal rTMS, CPT 90867

Your question:

Please send the medication trials in the current episode: each antidepressant, its class, dose, duration and response.

Our answer:

Sorry, the medication history was left out. Dr. Kim's medication trial summary is on the next page. Call (614) 555-0160 with questions. - Imani

Medication Trial Summary - Current Episode

Patient: Patricia Coleman · Member ID MBR-46005 · Dr. Daniel Kim, MD

1) Escitalopram (SSRI) up to 20 mg daily, 9/2025 to 11/2025, 10 weeks at full dose. No clinically significant response (PHQ-9 22 to 22).

2) Mirtazapine (atypical / NaSSA) 45 mg nightly, 12/2025 to 2/2026, 8 weeks at full dose. No response (PHQ-9 23 to 23).

Two trials from 2 different agent classes, each at an adequate dose and duration, in the current depressive episode. Both failed.

Daniel Kim MD 10/9/26
